Essay: future vision: Intangible Art

Studio: KLARABELLA Boerhaavestraat 19, 6001 AV, Weert, Netherlands

Studio: CJEP Gasthuisring 58, Ruimte 33, 5041 DT, Tilburg, Netherlands

We are living in an era in which our intelligence will become increasingly nonbiological and trillions of times more powerful than it is today. It's the dawning of a new civilization that will enable us to transcend our biological limitations and amplify our creativity.

Technology is evolving, and projects forward into an almost unthinkable future to outline the ways we'll use technology to augment our own capabilities, forever blurring the lines between human and machine.

Therefore my choice subject: Artificial Intelligence/Technological Singularity/Trans-Post-Humanisme.

Are we Humans becoming The New Toy of A.I.?
